THIS COURSE HAS BEEN MADE POSSIBLE BY AN UNRESTRICTED EDUCATIONAL GRANT FROM SERVIER AND VERTEC SA.

NOFSA - ISCD

BONE DENSITOMETRY CLINICIAN COURSE

2ND ANNOUNCEMENT

31 OCT – 2 NOV 2008

SOUTHERN SUN, GRAYSTON
(OLD CROWNE PLAZA) - GAUTENG

BONE DENSITOMETRY CLINICIAN COURSE

The National Osteoporosis Foundation of South Africa (NOFSA), in collaboration with Servier and Vertec SA is proud to offer you the opportunity to improve your knowledge and skills of bone densitometry with this internationally recognized course.

As the world leader in bone densitometry certification, the International Society for Clinical Densitometry (ISCD), provides comprehensive educational courses in bone densitometry and offers certification for those who perform DEXA scans and those who interpret the results.

The ISCD Bone Densitometry Clinician Course is most appropriate for those involved in the interpretation of DEXA scans and is open to MDs, PhDs, Nurse Practitioners, and Physician Assistants.

The core elements of the program provide a set of standard practices and information to raise the level of awareness and education in bone densitometry. The course emphasizes central DEXA testing. In addition, a solid foundation in other forms of bone mass measurement, including peripheral DEXA and QCT is provided.

BONE DENSITOMETRY
